Mr. Michael Guillaume
EG&G Rocky Flats, Inc.
Interlocken Building 080
P.O. Box 464
Golden, CO 80402-0464

Dear Michael:

After meeting with me and Steve Schmidt, Rocky Mountain Consultants (RMC), on September 17, 1992, regarding the goals of the OU3 field work under CERCLA, there were several tasks identified for follow up by the city or EG&G.

The City has provided EG&G with the following information as requested:

- Color photographs of Broomfield's sediment sampling sites around the shoreline of Great Western Reservoir (GWR).
- A copy of the 1992 Great Western Reservoir Monitoring Report which contains historic water surface elevation data.
- A copy of the drawings illustrating the 1992 Broomfield GWR sediment sampling program and results and an aerial photograph documenting historic water levels of GWR.
- A "loaner copy" of the Enviro-Check report documenting the 1991 Broomfield GWR sediment sampling program.
- A copy of the city's Draft Reservoir Management Plan was requested by EG&G. The city and RMC decided that this plan was too preliminary in nature to release to EG&G. However, the city is working closely with Mark Van Der Puy, DOE-RFO, on a new draft reservoir management plan. The conceptual ideas in this new draft should be available to EG&G through DOE. Mr. Van Der Puy has volunteered to attend or send a representative to future meetings on this topic to improve communication and efficiency between the CERCLA work and the GWR replacement project.

All of this information was provided to EG&G in September. If you did not receive any of the above items, please notify me so that I can make arrangements to send additional copies.

In return, the city was expecting, but has not received, responses from EG&G on the following items:

- Would DOE/EG&G be interested in testing the remainder of the 1991 Broomfield GWR sediment samples currently stored at Accu-Labs Research, Inc.?
- EG&G's Paul Grabowski was to contact RMC to exchange information so that RMC and EG&G could convert sample location data between each other's coordinate systems.
- EG&G was to provide RMC with the current map of sampling sites for OU3. A copy of the map was shown to us at the September 17 meeting.
- EG&G was going to check on the time frame when "raw" plutonium data from the OU3 field work would be made available to the city.
- EG&G was to reproduce the Enviro-Check report and return the "loaner copy" to Broomfield.
- EG&G was to set up a meeting in the next couple of weeks with DOE and EG&G representatives to discuss how a long-term management plan for Great Western Reservoir needs to be integrated with the OU3 work.

If you have any questions or need clarification on the requested information, please call me at 469-3301 ext. 363. If for some reason EG&G cannot provide the requested information, please advise so that the city can direct its requests to the appropriate DOE contact person.

Sincerely,

Kathy Schnoor
Environmental Services Administrator
